

FROM OUR FARMS IN MULTAN

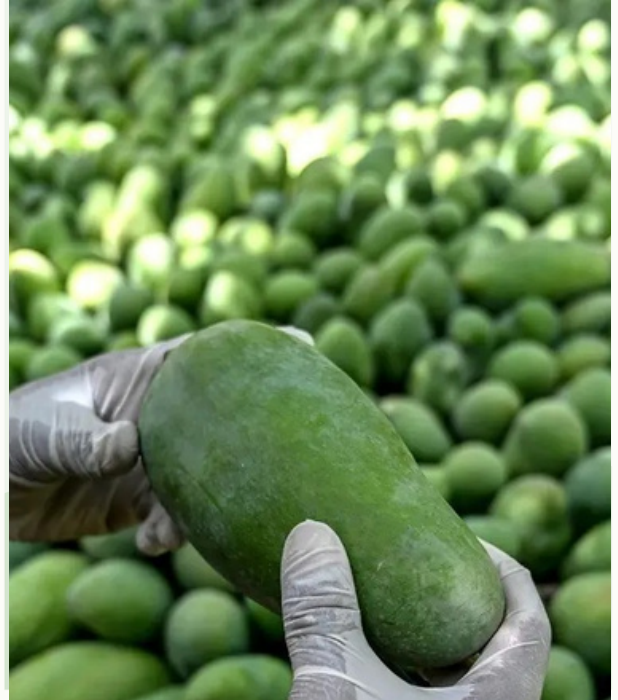

Fresh produce, grounded in experience.

Laang Agro Farm is a family-managed agricultural operation based in Multan, Punjab, Pakistan. Across our mango orchards and vegetable & greenhouse operations, we focus on careful crop management, seasonal quality and dependable market supply.

Mango Orchards

Vegetable + Greenhouse Farm

Buyer-focused

OUR APPROACH

Quality first. Practical farming. Long-term relationships.

Our work spans orchard management, protected cultivation and seasonal field crops. We combine hands-on farming experience with improved cultivation methods and a practical interest in new varieties, agricultural inputs and international partnerships.

VISIT OUR FARM

OUR MANGOES

Pakistani mango varieties.

A longer seasonal window.

Our orchards include established main-season varieties alongside selected late-season mangoes. Chaunsa LSF and Chaunsa LF help extend the harvesting window beyond the core season.

ORCHARD PRODUCE

01

Ratol

Main season

A distinctive Pakistani mango variety known for its compact size, rich sweetness and full flavour.

02

Sindhri

Main season

A recognised Pakistani mango variety selected for fresh-market quality and seasonal harvest.

03

Chaunsa W

Main season

A premium Chaunsa variety valued for its flavour and fresh-market quality. Typical fruit weight ranges from approximately 190 to 450 grams.

04

Sindhri N

Main season

A Sindhri selection with larger fruit size, averaging more than 350 grams per mango.

05

Chaunsa LSF

Late season

One of our two late-season varieties, selected for larger fruit size, with an average weight of more than 500 grams per mango.

06

Chaunsa LF

Late season

One of our two late-season varieties, with a smaller fruit profile and a typical weight of approximately 150 to 250 grams per mango.

LATE-SEASON FOCUS

Chaunsa LSF + Chaunsa LF extend the harvest window.

MANGO HARVEST CALENDAR

A focused seasonal mix, managed from crop to harvest.

Indicative seasonal availability — actual harvest periods may vary depending on climatic and crop conditions.

Variety	Typical Start	Typical End
Ratol	20 JUN	25 JUL
Sindhri	13 JUN	17 JUL
Chaunsa W	15 JUL	10 AUG
Sindhri N	13 JUN	14 JUL
Chaunsa LSF	17 SEP	05 NOV
Chaunsa LF	02 OCT	15 NOV
